

REMARKS

Applicant acknowledges that claims 19-36 are pending in the application, and that the Office currently holds claims 19-36 as rejected.

35 USC §102(b)

The Office holds claims 19-28 and 30-36 rejected under 35 USC §102(b) as being anticipated by Rosenfeld (the '859 patent).

The references cited in the Office Action can not affect the novelty of the present method and arrangement. Gevins relates to an improvement of the spatial resolution of the electrodes removably connected to the scalp. Such problem could appear in connection with the steps defined in the sub claims only. Rosenfeld makes first a testing measurement, thereafter the actual measurement and the result is inferred from the comparison of said measurements. This reference does not affect the novelty of the present invention either.

The present method can not result from the combination of the methods according to said references because these two methods can in fact not be combined. Rosenfeld discloses a completely different method and Gevins discloses steps which could, under circumstances, only relate to the subject matter of the sub claims in the present application.

Applicant believes that the above amendments and remarks are fully responsive to the Office Action mailed 12 September 2007. Applicant respectfully requests reconsideration and removal of all objections and rejections of claims, and that, in view of the above amendments and remarks, the application is now in condition for allowance. Applicant respectfully requests the Examiner to contact the undersigned to timely resolve any minor issues that may remain in the application. Alternatively, Applicant invites the Examiner to suggest alternative claim language for Applicant's consideration, in order to facilitate timely prosecution of this application.
